HH-level wellhead device and Christmas tree

Reference standards: API 6A, ISO10423, GB/T22513 and NACE 0175

This product is suitable for the use in working conditions with highly corrosive media such as hydrogen sulfide. The materials used for the device are specially corrosion-resistant materials.

Product Features

- It can be used in Puguang and Yuanba in Sichuan, as well as overseas such as in Uzbekistan and Kazakhstan.
- The working pressure can be up to 105MPa, HH-NL,PU,PSL3G,PR2
- The H2S content can be as high as 65% and the CO2 content can be as high as 35%.
- The all-metal sealed device is suitable for working in conditions of high pressure, corrosion and other harsh conditions.

It can be used in Puguang and Yuanba in Sichuan, as well as overseas such as in Uzbekistan and Kazakhstan.

105MPa
Working pressure up to 105MPa, HH-NL,PU,PSL3G,PR2

65%
H2S content up to 65%

35%
CO2 content up to 35%
